Climate. All is well. All will be well.

Price: £14.99

Short Description

This book blows away the hot air of global warming. Net-zero is a pointless and ruinous folly.

Description

All is well with the weather. This book cools down the debate on global warming and blows away the hot air. The false claims of scaremongering climate hysterics are superbly rebutted. There is no need to panic. This book calms down the debate. Carbon dioxide is a life giving gas, the policy of net-zero is a pointless and ruinous folly.
